

All-Stage Nursery Mix *Plant-Pal*

BEST FOR: PLANT NURSERIES, HOME GARDENS, COMMERCIAL FARMS
-GRANULAR, OMRI LISTED, MADE IN USA-

Ingredients & Purpose

WORM CASTINGS: Enhance soil structure, water retention, and aeration; provide slow-release nutrients (NPK); introduce beneficial microbes for disease suppression and soil biodiversity.

8-3-1 GRANULES: Supply balanced organic nutrients (8% N, 3% P, 1% K) for healthy plant growth; support microbial activity and improve soil fertility.

CALCIUM: Improves soil structure and aeration; balances pH; increases nutrient availability and supports beneficial soil microorganisms.

ZINC SULFATE: Provides essential zinc for enzyme activation, protein synthesis, and growth; promotes flower and shoot development for increased fruiting.

CLEAN WOOD FIBER: Enhances aeration and drainage; prevents compaction; combined with dairy compost to enrich soil and support microbial life.

ORGANIC DAIRY COMPOST: Boosts soil nutrients, microbial activity, and structure; improves water retention and supports robust plant growth.

Application

Mix 1-2 cups per cubic foot of soil or potting mix before planting.

For established plants, top-dress 1/4 cup around base monthly and water in.

Use for seed starting, transplanting, and ongoing plant nutrition.

Key Benefits

- All-stage nursery mix enriched with worm castings and 8-3-1 granules for balanced, slow-release nutrition and robust root development.
- Improves soil structure, aeration, and water retention for healthier, faster-growing seedlings and transplants.
- Boosts soil biodiversity and disease resistance with beneficial microbes and essential micronutrients like calcium and zinc.
- Clean wood fiber and organic dairy compost enhance drainage, fertility, and sustainable plant growth.
